

AN EXCEPTIONAL MACHINE DESERVES EXCEPTIONAL SOFTWARE.

SUPPORTED SOFTWARE FOR THE **LENOVO® THINKSERVER™**

MICROSOFT® WINDOWS SERVER® OPERATING SYSTEM OFFERINGS

Lenovo offers Microsoft® Windows Server® Operating Systems for Lenovo ThinkServer systems as Reseller Option Kits (ROK). These offerings, available to Business Partners only, are packaged in easy-to-purchase kits which are competitively priced. These kits are designed to provide resellers with flexible Microsoft Operating System products that can be easily installed and configured for customers.

Lenovo offers a rich portfolio of Windows® Server 2008 solutions. Windows Server 2008 is a robust operating system. With built-in, enhanced Web and virtualization capabilities, it is designed to increase the reliability and flexibility of your server infrastructure while helping save time and reduce costs. Powerful tools give you greater control over your servers and streamline configuration and management tasks. Plus, enhanced security features work to harden the operating system to help protect your data and network and provide a solid, highly-dependable foundation for your business.

ALL WINDOWS SERVER 2008 VERSIONS HAVE THE FOLLOWING FEATURES:

- **Virtualization:** Hyper-V™ technology, an integrated hypervisor, is ideal for highly flexible virtualized environments
- **Scalability:** Offers higher CPU and RAM support to meet your growing business needs
- **High Availability with Failover Clustering:** Reduces downtime and improves business continuity
- **Security:** Network Access Protection (NAP) helps prevent non-compliant computers from accessing an organization's network, helps verify the health of connecting computers, and helps enforce compliance with an organization's security standards
- **Flexible Application Access for Remote Users:** Terminal Services RemoteApp (TS RemoteApp) allows users to access individual applications instead of a computer desktop with applications that run on the host computer and send only the application windows to the user, reducing administration and deployment costs

SUPPORTED SOFTWARE FOR THE **LENOVO® THINKSERVER™**

NOVELL® SUSE® LINUX ENTERPRISE SERVER OPERATING SYSTEM OFFERINGS

- Novell is Lenovo's Preferred Linux® Provider for ThinkServer

SUSE Linux Enterprise Server for Lenovo ThinkServer systems consists of bundled offerings that include the operating system description and support in a single, easy-to-purchase offering. These offerings deliver an enterprise-quality, highly interoperable Linux server platform for mission-critical applications. SUSE Linux Enterprise Server from Novell, combined with Lenovo ThinkServer systems, is sold with support and includes everything needed for complete customer solutions.

Key advantages of SUSE Linux Enterprise Server:

- Most interoperable
 - The only enterprise-class Linux distribution endorsed by Microsoft and SAP
- Integrated Xen® virtualization
 - First distribution to ship with integrated Xen hypervisor
- Leading security, reliability and performance
 - A ppArmor® application security framework
 - Integrated VPN, firewall and antivirus protection
 - Industry-leading scalability and built-in high availability
- Enterprise capabilities at an affordable price
- Virtualization (Linux and Windows)
- High availability
- Powerful security customization
- Optimization and certification with SAP applications

A subscription for SUSE Linux Enterprise Server includes the current product, future enhancements, product fixes and unlimited telephone and Web support for a period of one or three years. Instead of being tied to costly licensing fees and client access licenses, you buy what matters: a subscription for the updates and support that helps you run your business. Subscriptions are sold on a per-machine basis, regardless of the number of processors or cores. One subscription for SUSE Linux Enterprise Server covers all virtual machine images on the same physical server. When you subscribe to SUSE Linux Enterprise Server, you can now choose to include either Standard 12x5 or Priority 24x7 technical support.

**VMWARE® AND RED HAT® OFFERINGS
